DRAFT 60% DESIGN REPORT, VOLUME 2 OF 3, GROUNDWATER MODELING AND DESIGN ANALYSIS, OPERABLE UNIT 1, FRITZSCHE ARMY AIRFIELD FIRE DRILL AREA, FORMER FORT ORD, CALIFORNIA

Dear Ms. Youngblood:

The Department of Toxic Substances Control (DTSC) has reviewed the "Draft 60% Design Report, Volume 2 of 3, Groundwater Modeling and Design Analysis, Operable Unit 1, Fritzsche Army Airfield Fire Drill Area, Former Fort Ord, California," dated February 28, 2006 (60% Design Report). The document was prepared by HydroGeoLogic, Inc. (HGL), for the United States Department of the Army, Corps of Engineers, Sacramento District. The 60% Design Report outlines the groundwater modeling results and select design criteria for the groundwater extraction and treatment system that is currently proposed for the Former Fort Ord Operable Unit 1.

DTSC review of Volume 2 of the 60% Design Report found that the document is well written and complete. We have no comments, at this time, and we look forward to the opportunity to review Volume 3 of the 60% Design Report in the near future.

Ms. Gail Youngblood March 30, 2006 Page 2
